

Frame agreement awarded Norsea Group AS

DEA has awarded Norsesea Group AS a frame agreement on supply base services.

Norsea Group AS delivers services such as provision of personnel and equipment, transport, logistics and waste handling from Stavanger to Hammerfest.

The frame agreement will secure DEA with supply base services for the next three years.

“DEA is entering a time of increased activity level. We are developing the Dvalin field and are getting closer to operatorship of exploration wells and production. In this phase, it is crucial to have competent and experienced supplier on supply base services”, said Jan Petter Rød, Head of drilling and well completion in DEA.

The Dvalin field in the Norwegian Sea is developed as a tie-back to the Heidrun platform, and Vestbase in Kristiansund will therefore be the preferred supply base of choice for that project.

The agreement will be effective as from 1 January 2018 and will last for three years with an option for extension.
